Subject: Ravalli County Airport

To whom it may concern,

I encourage you to support the upgrade of the Ravalli County Airport. I live in Flathead County and fly out of both GPI and S27. Several years ago I made many flights to Hamilton on both business and pleasure. Your community is wonderful to visit and the people of the Hamilton area are very welcoming. As your community continues to grow, I feel it is important to plan for not only current airport use but also for your aviation community's future and to always keep in mind what is best for the health, safety and welfare of all concerned. Anything you can do to improve the safety of both people in the air and people on the ground is of utmost importance and upgrading your airport to meet FAA standards is the first step.

Please support this upgrade!

Thank you,

Charles J. Manning
