Subject: Ravalli County Airport

To whom it may concern

It has been brought to my attention that there are concerns about the Ravalli County airport.

First burn the school, apparently local people are not being educated. Then doze all the houses that are any where near the airport affected area, after all the airport was there before most of those houses.

Next do not spend a dime on anything to do with the airport, but instead spend it on long ambulance rides and rebuilding after fires ravage the countryside. Who cares about food, we don't need agricultural sprayers, let weeds, insects, and other pests destroy the biggest industry in the valley.

Jobs, who needs them, retired people settling there is recession proof, isn't it.

Now if you dispose of all firetrucks, ambulances, law enforcement vehicles, and utility maintenance, the community will be nearly perfect

And last but surely least never fix a bridge, do not improve or even repair a road or highway.

By following my insane advice your community will save a small fortune, at first, then where will it all lead...no where.

Clinically your devils advocate

Willie Hurd
