Subject: Ravalli County Airport Comment

Please consider my comments in your decision regarding Ravalli County airport improvements.

It is important for any community that already has an airport to maintain and upgrade it over time. This beautiful valley needs to remain attractive to all of the surrounding public including those travelling by air. With our changing weather patterns and increased wild fire activity, it is wise to maintain a safe fire fighting operation facility for tanker aircraft needing runway length for fully loaded runs.

It only makes sense to relocate the runway away from homes and the school.

This is just one more element of important infrastructure requiring maintenance and upgrade over time.

Sincerely,

Steve Inman
Billings, MT
