Mr. Norderud,

We need to improve the Ravalli County airport and we must accept the plan and funding from the FAA. The majority of the funding will come from the FAA (90%), so how can we not accept this improvement plan. The airport is a source for jobs, fun activities like skydiving, recreational flying, and sightseeing. What will happen to the Airport Café, a great place to eat and visit with folks, if the airport continues to decline in its ability to maintain the runway safely? There are a number of people living in this valley who rely on a job at our little airport. We must expand the runway and make it safe for all who live and work here.
