Dear Mr. Norderud,

Please forward this letter to the Ravalli County Commissioners.

Thank You

Dear Commissioners,

Please take the time to discern the **TRUE FACTS** in regards to the proposed improvements at the Ravalli County Airport - and then make your decision. Newspaper articles written and public comment made by those in opposition are strongly refuted by information submitted by those who support the airport. Somebody isn't being completely honest..... How can **"public vote"** be considered if the public has been **MIS-INFORMED?**

I am in favor of the safety improvements - alternative 4B. It just makes sense to seize the opportunity to improve the airport - at no cost to the citizens - to maximize safety for aviators and citizens - to increase jobs and revenue - all without turning RCA into a "jetport" or causing prairie dogs to mutate! Sorry, but it just seems that this small group of opponents to the airport will say anything, use scare tactics, distort the truth or flat-out lie in order to coerce the public into rejecting airport improvements. There has not been outlandish statements coming from the airport supporters - they seem to be able to back-up what they say with facts.

Laurie Kelly
