Mr. Norderud,

Why do the proposed improvements at Ravalli County Airport need to be put to a vote of the public? The Commissioners were elected into office by public vote. The public then relies on this elected official to serve the needs of the people who voted them into office and the needs of those who did not vote them into office. Decisions made by elected officials are not going to please all of the people all of the time – somebody is not going to “get their way.” This is how a democratic society runs. Since the public often cannot agree on all issues, we rely on the experience and knowledge of our elected officials to make the best decision for us. What would it cost if every decision for the county was put to a public vote?

Let the Commissioners do the job they were elected to do. I support the expansion and safety improvements recommended by the FAA.

Thank You,

Switzer 268 Hamilton
