Subject: Ravalli Co. Airport

My property and home back up to FAA property used for the landing strip & I AM AGAINST THE EXPANSION OF THE LANDING STRIP. 1. Some pilots do not follow correct landing procedure. More traffic and larger airplanes just puts more and larger planes flying LOW over my home. 2. There are many of us on fixed incomes and the costs associated with airport improvements should be born by those using the airport i.e. those flying in and out., not the low income . 3. With the change of access patterns I understand they will fly over the Ham. H.S., this does not seem safe to me. Thanks for your consideration. SARA E. STEADMAN 222 MERGANSER LANE.
