Subject: Bitterroot River Floodplain

Ravalli County Commissioners,

Please make no changes to the regulations regarding development and construction in the Bitterroot River floodplain. Any additional septic systems in the floodplain will only add to the already considerable pollution burden carried by the river. The Bitterroot River already looks nothing like it did 60 years ago when I was a kid. The rocks are now mossy and algae-covered and I'd hate to see it keep getting uglier.

Sincerely,
Alex Shaffer
