Subject: Proposed changes to streamside development restrictions.

Ravalli County Commissioners:

Please do not change the existing Ravalli County restrictions which prevent development within the floodplain fringe areas along the Bitterroot River or along other streams within Ravalli County. I can see where a few developers and builders might greatly profit from such changes, but the great majority of Ravalli County citizens would certainly be harmed by the proposed changes which are guaranteed to cause further degradation of the Bitterroot river and tributaries to the river.
