Subject: Draft Flood Plain Regulations

Dear Sirs:

Considering the definition below:

Environmental Engineering Dictionary

The portion of the flood plain outside the floodway which is covered by floodwaters during the 100-year recurrence interval flood. It is generally associated with shallow, standing or slowly moving water rather than deep, rapidly flowing water.

See also: AANWR ,

http://www.ecologydictionary.org/FLOODPLAIN_FRINGE

I recommend you **do NOT allow regulations that allow homes in the flood fringe; nor allow septic systems in the flood fringe.**

For your information - I was not able to find a copy of your proposed draft regulations on the Ravalli County website.

It would have been user friendly to attach it as a document , or provide a link, at the notification on the county's calendar.

Sincerely, Elizabeth Ballard
