Subject: WOW! WHATA WILD WATER WEBSITE! !! Where is it all going????

Guys, please read the links below, everything I have been warning about regarding the real reason the Fed is buying off our legislators and citizens to pass the CSKT is documented in the following links. Our water is for sale, just as our public lands are and very few elected officials are willing to put the time in to follow the money behind these illegal, unconstitutional actions by this administration. First was the USFS filling for water rights in our closed basin "to prove to the tribes that they were taking CARE OF THE FISHERY as stated by Julie King when asked where the push was coming from; then the Water of the US that has somehow gone underground but is still a huge threat that will pass by administrative action versus congress; at the same time the CSKT rears it's ugly head and we have Bitterroot state legislators, whom we worked to get elected, supporting the compact. What part of the Montana State Constitution do they not understand? What part of the legal mess that will be the end of private property rights and our water rights if this is passed do they not understand?

I love Fred Thomas but with his support of the compact, coupled with the renewed look at his role in the deregulation of Montana Power, he could be toast in his future in politics and I hate to see that happen so hope he is reading all of the consequences that face us if he helps push it through. Threat of litigation? It is a lot easier to win your case if you are protecting the states stance versus having to fight what the state has illegally done. There will be litigation no matter how this ends and if the state legislature passes the compact without passing the bill for funding litigation it is a double hit on the citizens they represent.

Please read below.

WOW! WHATA WEBSITE! This from Michael Gale READ IT ... SIT UP AND PAY ATTENTION !!

<http://www.coachisright.com/montana-water-wars/>

And don't quit there! Following are additional sources that could indicate what it is really all about if our State of Montana allows another government take over its CONSTITUTIONAL OBLIGATION to protect the water rights of its citizens!! If water levels of Lake Michigan (the size of a small ocean) can be lowered by exporting fresh water to China, think what could happen to waters of our Flathead Lake, Hungry Horse Reservoir and Lake Kookanus. And why do you suppose the Ogallala Aquifer is being targeted also. . . and the Upper Missouri River Breaks feeding into the AGR lands of Middle America and the great Mississippi? We are the land famous for ABUNDANT WATERSHEDS!! PLEASE DON'T LET IT BE TAKEN AWAY FROM ALL OF US!!!

Is there any protection against where our water rights legislation (HB 262) could take us if this 1500 page CSKT Water Compact document is approved by our present legislative body and control goes to the reservation government (under federal government control) already abusing irrigation water rights of its non-native property owners? Could this attitude and unacceptable behavior help explain the millions being directed toward passage of this single, apparently VERY SIGNIFICANT BILL ????? In support of its perpetrators?

JUST HOW WELL INFORMED, REALLY, ARE THE MONTANA CITIZENS? We know how desperately this compact is being forced through by the volumes of promotion through PEOPLE WE KNOW and can identify. Governmental over-reach would extend beyond the eleven designated NW MT counties, but would impact the financial security of the entire state.

Clarice Ryan, Bigfork, MT. 406-837-6929 A "NO" vote on HB262 is imperative! !
