Subject: County Road Improvement

My name is Herb Howe. My wife Diane and I live at 122 Sleeping Child Drive. This email is to all of you regarding the article of April 29th in The Star regarding a proposed 7year road improvement schedule. It appears a lot of thought went into these road improvements and as a tax payer it is appreciated.

FYI: The county road crew does an excellent job on Sleeping Child road whether weed control and more importantly during winter to keep the road open for the school buses as well as those of us living on the road. The road surface for the most part is solid and I agree that compared to other roads does not need any chip sealing in the near future.

The one concern myself and others have of this road is: Center and Shoulder lines are faded and/or non-existent for the majority of this road. I would ask you to consider as soon as possible to repaint these lines for the safety of all users of this road.

Thank you in advance for your consideration.
