Subject: Request Fireworks ban

Hello Ravalli County Commissioners-

I would like to respectfully and urgently request that you institute fire restrictions in Ravalli county that prohibit the use of fireworks on public AND private land. It is far far far too dry and our local (rural) fire departments do not have the resources to respond and protect properties as a result of avoidable fires. We live in a dry dry dry hillside, and am very nervous about fireworks being set off and landing on our property, and starting a fire.

I urge you to please take action in this very weird year and protect our private properties. As much as I love fireworks normally, this is not the year for it. As disappointing as it will be to some, people can save their fireworks for new years, or some other time when it gets wet again.

Thank you

Laura Howe
