Subject: New Children's Health Report
Attachments: Childrens-Health-Report.pdf

Dear County Commissioners and County Board of Health,

Since you did not respond to our new study concerning the health of the children and the wildlife, I thought maybe this new Children's Health Report might help you decide to take part in helping to protect the children, especially unborn and newborn. As the saying goes if you are not helping with the solution, you are a part of the problem. Do you really want to be an accomplice in killing and maiming newborn children? I can see how the County Commissioners and the County Board of Health could ignore the birth defects and health issues we reported on the wild and domestic animals, although I don't understand why? If you continue to ignore what the pesticides (umbrella term) are doing to the children, you are as culpable as the people who lied about the safety of all the deadly pesticides now being used. Chemicals like Roundup have been shown to kill not only humans, but most life on the planet, both plant and animal, which will result in mass extinctions (which already are according to studies). You are as guilty as the other people/agencies who ignored the deadly effects shown by thousands of studies and tests and allowed the birth defect causing pesticides to be used. You are supposed to protect the lives and health of the citizens of Ravalli County, according to your job description.

Hundreds of children have been born with defects that have been shown by thousands of studies to be the result of fetal pesticide exposure.

Many newborns and young children have died because of those defects. We told you years ago that the wild and domestic animals were being born with heart defects. Now heart defects are the #1 birth defect on children (according to KPAX news report), including on children in Western Montana. Is there some reason you are protecting the chemical companies, rather than the citizens of Ravalli County (especially the youngest ones)? Of course, I realize that newborns can't vote, but if they don't die of their birth defects or of childhood cancer, they will grow up to be voters.

I would like a response saying what you plan to do to mitigate this insane destruction of newborn children. Why do people scream about abortions of unwanted children and don't say anything or do anything about the killing and maiming of wanted, loved children? That makes no sense to me. Maybe you have an explanation?

Sincerely,
Judy Hoy
