Hamilton, MT 59840

Dear Page,

As of August 1<sup>st</sup>, 2016, Belfort exited the AWOS web service business. The DigiWx websites have reverted as of August 1<sup>st</sup> to me, where it all began over 14 years ago.

My name is Tom Cryar. I wrote all the DigiWx FBO software and I wrote and set up the 80+ websites which show pilots your local weather conditions.

Belfort was subsidizing the cost of your website (and all the other websites) for a marketing advantage. Now that Belfort is no longer involved with DigiWx websites, they will not be subsidizing the cost of maintaining the website for 6S5.

I will begin sending email invoices to you. Please email me with the proper email address to receive the invoices. Send to my email address, [webhosting@higherplane.org](mailto:webhosting@higherplane.org).

I will be invoicing you once per quarter in advance for 3 months of web hosting. The first few invoices may cover more or less than 3 months of service until I can get my accounting systems geared up. Please be patient during this change-over period. If you have any questions, email them to me.

Once I begin sending your invoices to an email address that you provide, the email invoice will contain a "View or Pay Invoice" button. Clicking that button will take you to a secure [QuickBooks] web page where you can pay the invoice with any major credit card, a debit card, or bank-to-bank Electronic Funds Transfer. It will simplify both your and my accounting tasks if you will use this convenient way to pay your invoice.

Thank you for all your business in years past. I look forward to many more years providing web access for your customers (pilots).

Cheers,  
Tom Cryar
