March 1, 2017

Dear Commissioners:

Thanks to those Commissioners who had an opportunity to stop by my booth at MACo. As the government sales consultant for Yellowstone Country Motors in Livingston, my purpose at MACo was to insure that all Commissioners are aware that Counties, Cities, Special Districts and Fire Districts are eligible to purchase light trucks and cars at the same government fleet price as the State of Montana enjoys, if the vehicles are purchased from an authorized fleet dealer. This government fleet price has a significant discount over retail. As you make your decisions on vehicle purchases, I would appreciate the opportunity to provide you with a bid price

If your Sheriff is looking for a multi-purpose law enforcement vehicle that can withstand gravel roads, snow and rough terrain, Ram now produces a 1500 model with a SSV designation. You can view this vehicle at <https://www.fcausfleet.com/law-enforcement-vehicles.html/>. Dodge also produces an all-wheel drive Charger and a Durango with many features popular with law enforcement including a SSV designation.

The Park County Sheriff has been very pleased with Dodge Ram four door pickups. They are now ordering ¾ ton pickups that perform just as well as a ½ ton with very little increase in price. The other advantage is that these vehicles can be transferred to the road department when the sheriff has determined that a vehicle needs to be replaced.

Yellowstone Country Motors is able to completely up fit law enforcement or road vehicles to your specifications including radios, decals, toolboxes etc. Many agencies have preferred having vehicles turnkey ready when they arrive.

Thank you again for your consideration.

Sincerely

Marty Malone
