Subject: Refugees coming to Ravalli County

Gentlemen, First..let me apologize for the length of this email. If I had three minutes at a stand in a meeting this is what I would say...

I understand that there was a meeting regarding the introduction of refugees from Mid-Eastern Countries as well as war-torn areas of Africa being allowed to come to Ravalli County. I was unable to attend due to work, therefore I beg your indulgence for this email to express my concerns.

First > I am not at all opposed to refugees being given a safe place to live. I do not believe that Ravalli County would be that safe place IF the refugee is from the area described above..in short Muslim Nations. Now... for the most part, this would seem obvious. However, for those who would like some 'hard facts' to consider.. I've done some research on the matter and I offer some scenarios and problems that would most definitely need to be addressed by prudent people. All of which I believe our Commissioners to be, including YOU Mr. Hoffman.. and I don't care what anyone says. (smile). Furthermore, it is my understanding that the County Commissioners are charged with producing / implementing and administering policies that effect the people that live in Ravalli County... one of which is paramount... the safety of the citizenry. To wit>>>

Vaccinations: Here's what the Muslim people that adhere to strict Muslim guidelines believe. [Wikipedia Article Islam and Vaccinations](#) and a really great article on the topic published by the International Medical Council on Vaccinations. [Islam and Vaccines](#) . The latter article has a whole list of further reading if your bored. In short... Islam does not 'DO" vaccines. At all. Now... this is a very real problem. Why? CCHF. What is CCHF. [CCHF Wikipedia Article](#) Crimean–Congo hemorrhagic fever. Like Ebola on steroids. No known cure or vaccine. It is a tick-borne virus. We have ticks in this country. Is it all smart to allow people from the Congo, Pakistan, Iran, Syria where this illness is prevalent into our area if they have been, in any way exposed to this virus? Furthermore, are we going to require blood tests of these refugees to verify that they are NOT in fact carriers of this disease? Would they even submit themselves to such scrutiny? However on the other hand.. I understand that this is one of the many tick diseases that Rocky Mountain Lab is working on. Now.. I'm not a tinfoil kinda gal.. but... I know some folk who are, and how hard would it be to think that the Lab wants these people here for testing purposes? I know..that just sounds sick, but there are people who think that this is why its being pushed so hard into Ravalli County to have these people here. Seriously. Also... the refugees that are currently in Missoula are from the Congo. I wonder if they were tested for CCHF? Have been exposed in the past and/or carry markers of this disease in their blood stream. I know this sounds really gruesome, but it is what it is and needs to be addressed. Muslims are not into vaccinations at all. They are coming from third world countries for their point of origin regardless of where they are now. If these people are families, how are you going to require their children to receive vaccinations? I think this is a can of worms that we just don't need to be fishing with. (smile).

Safety: This conversation is mostly directed at you, Mr. Hoffman. Given the response times in Ravalli County and the fact that many... many people here enjoy the 'great outdoors,' I would ask you this question: How am I, a single women, north of 50, supposed to defend myself if I am hiking in the hills and I come across a group of refugees who have no women in the group? Though they claim to be peaceful people, their religion says that if I am a women alone, without a head covering, I am a

prostitute and to be raped at will. It is their duty. Now.. I'm no Melania Trump, in fact, I would go so far as to say, I'm probably not worth a second look at all, however, I would be a woman, alone, in the wilderness with no head covering. Now.. I'm not alone in my hiking habits. I don't go real far, certainly not long distances off of main trails. But I grew up in the mountains, was a guide in the backcountry, Frank Church Wilderness and feel quite alright hiking by myself in the hills. I've come across my fair share of grizzlies, moose and lions. If one is smart and aware of their surroundings, check the weather before they go etc.. fairly safe. But what about now? I could no more fend off an attack by this group of people anymore than I could a grizzly bear. When I stated that I am not alone in my hiking habits, I am not. I see people all the time taking a short walk/hike in the hills. They go to places like the Blodgett overlook, the lake trails around Twin Lakes, Mill Creek trail etc. If I meet a man in the hills, I don't twice about it. But if I see a group from a Muslim country, talking a foreign language.. now what? If I wait for them to get close enough to attack me, its already way past the time for defense. I cannot fend them off. Mr. Hoffman, women in this valley, hike, hunt and fish by themselves. What do you recommend? And lest you think I'm crazy and/or over-reacting.. I've done research on this topic. Like most religions there are the zealots. Zealots in Islam are very dangerous people indeed. Which type of Muslim is coming here? How can you know.. for certainty?

While at first glance this dilemma of refugees seems a complex issue. Its not really. If one has the courage to face the truth of the matter which is this: There is no compatibility for Islam extremism and Ravalli County culture. Period. There probably is in large cities or metro-areas with large diverse populations where refugees may go to live with like-minded individuals. But there are not any of those large populations of people here.

How, as a county are we to deal with demands for Halal food in our schools? Can we really afford two menus? Two types of food? How do you protect the single females in this county who hunt, fish and hike by themselves or..... just walk around town? OR>>> the highschool girl walking home from volleyball practice? Our culture here in Ravalli County affords all of us a level of security because we are like minded individuals and share largely the same values. The Muslim refugee does not. Period. What about employment? Where are these people going to work? Do they even speak English well enough to be employed? Are they going to pound fence posts? Change pipes? Here in Ravalli County we really DO have people already doing those jobs and especially the highschool populations. So what is left for these people? Working at Rocky Mountain Lab? Think on THAT one for a minute. Seriously. If you were a military operative that wanted to cause harm to the US.... would a lab of this type be a target? Again.. facing the truth in this matter is paramount to understanding it. Its not hard. What IS hard is facing the honest to God truth of this matter and that is this. These refugees may not really BE refugees. I do not believe that there are resources enough to be able to fully vet these people. We must know if they are military operatives or not. We have a class 4 lab to protect. Don't kid yourself into thinking this lab would NOT be a target.

I urge you to figure out a way to say NO to the refugees in our county unless there is a bona fide way to vet them which would include complete health check ups, vaccinations given...in short, place upon them the same standards that were placed upon our ancestors when they migrated here and came through Ellis Island. It was a good standard and it worked. Maybe we can at least do that.

Finally: The following excerpt is an overview of current US Law regarding refugees and refugees status. I find this fascinating given the 'status' of the particular people now calling themselves refugees and seeking shelter in Ravalli County. Check this out.

“The United States, however, denies refugee status to any alien who actively persecuted individuals of a certain race, political opinion, religion, nationality, or members of a certain social group. As a matter of public policy, the government also typically refuses

refugee applicants previously convicted of murderer. For refugees who have "firmly resettled" in another country, the United States will deny a request for refugee admission. The government considers refugees "firmly resettled" if the refugees have received an offer of citizenship, permanent residency, or some other permanent status from a foreign country. "

This may be found here: [Immigration US Law Overview](#). I guess the very best test would be this: Place a Quran under their right hand and ask them to swear to the following: 1) Israel is a Nation that has the right to exist. 2) Christianity is a good religion. 3) Israelis and/or Jews are good people. They could never swear to this because they have ALL actively persecuted these three people groups. Male, Female and Children. Now..we know that it is okay for them to lie to 'infidels' but not to swear on the Quran. Also.. I do believe that these people if they have first been in Europe, have had the offer of permanent residency extended to them. Its a thought. I am very concerned over this. Not because I am islmaphobic.. I have many colleagues etc in the mid-east, but I do not feel like it would be a good fit to have them here. Thank you for indulging the length of this email to be able to express my concerns. PS>> Great Job to ALL of you. I feel we have some pretty good Commissioners. Thanks.
