To: County Commissioners
RE: Biotechnology Education

Date: August 3, 2017

The Montana Agricultural Business Association is passionate about educating our Montana citizens about biotechnology and the value it provides for all Montanans. We worked with the Montana Farm Bureau Federation and Montana Grain Growers Association and created the enclosed postcards in an effort to spread the word about biotechnology and the great opportunities it provides.

We hope that you find the information on the postcards informative and that you will share this through your offices as you deem appropriate.

We appreciate all of the hard work that you do for Montana Agriculture – please don't hesitate to let us know if there is anything that we or one of our business members can provide.

Regards,

Krista Lee Evans
Executive Director
