Information Update

FRIDAY, SEPTEMBER 15

Summary: The fire was less active with the rain and cooler temperatures. Suppression repair work continued on the hand lines and dozer lines constructed during fire

suppression efforts. Firefighters took the opportunity to construct direct handline from the previously burned buffer uphill approximately 1 mile. Crews pulled and drained hoses on parts of the fire where mop-up efforts are complete.

Today: The predicted moisture and cooler temperatures will slow fire activity to creeping and smoldering in most areas of the fire. Crews will mop-up and strengthen lines along the western edge of the fire. Suppression repair will continue along Highway 12 and south of Lolo along Highway 93. Hand crews will build direct line to the top of the ridge north of Larry Creek.
