Glenda,

Would you please see that all the commissioners get this and put it in public correspondence? These photos are of Northview/Teddy Bear Lane where Lee Foss constructed a road without a county road department permit. Bitterrooters for Planning believes this road is illegal and dangerous, and we are pursuing a resolution to this problem, either legally or through implementation of a policy designed to address public easements that were platted more than a century ago.

Would you please also forward this to the county attorney's office?

Thank you,
Carlotta Grandstaff
for: BfP

It was only a matter of time before we said this would happen, thank goodness I was home and able to round up my horses. This road is dangerous and shouldn't even be here!!
