**To:** Commissioners  
**Subject:** Dangerously Diluted Bitumen

Right, dangerously diluted,  
But at Canada's request  
Exempt from paying into  
8 pennies per 42 gallon barrel  
PROPOSED TO BE PIPELINED  
AT OVER 400 BARRELS A MINUTE  
DOWN THE MEANDERING MILK RIVER AND UNDER THE MISSOURI JUST BELOW FORT PECK

ALL TO DELIVER CONTRACTED DILBIT TO LOW LAND NEDERLAND SEA PORT TAX FREE ZONES OF  
FOREIGN OWNED REFINERIES AND ONE AMERICAN OWNED,

Most all for export of dilbit made diesel to Europe, Africa, and South America!

Got the picture?  
There are toxic zones on both ends of the KXL!!!

Click and look!

Consider TPP and corporate sovereignty and the trending of global courts for global corporations,

What would you and your kids say  
About a: KXL THRU THE BITTERROOT VALLEY?

Ask the kids!  
Some will tell you correctly that Quantitative Easing and tax-protected global gamblers are involved!

That Goldman Sachs downgraded  
Bitumen contracts five months ago.  
That British Columbia Premier  
Insisted on good faith assessment  
And payment for proposed pipelines  
Across BC!

Want to understand big picture?  
Look at proposed Northern Gateway  
Twin Pipeline

One pumping imported diluents  
To get blended into bitumen tar,  
Often by Chinese owned outfits,  
Then pumped in the parallel,  
Twin pipeline back to seaport for  
Export to China.

What's problem w the stuff used to dilute bitumen to be pumped thru Our USA?

Go to the \$1000 a gallon cleanup of the Kalamazoo River of dilbit into a creek and then the river.  
Total cost now approaching a billion dollars.

Go to the smelly smelly, toxic air that drove people out of their houses, In Oklahoma last year, from  
the dilbit we all saw flowing thru the streets, From a rupture in a an old reversed pipeline.

Go to definition of aromatics!  
Sounds Ok!

Read what it could do to lungs of animals and people,

Who live, farm and recreate  
In the other part of our State!

Read about the remote controlled,  
Three and four thousand horsepower pumps.

WHY MAKE BAKEN CRUDE  
PAY IN PIPELINES PAY INTO  
SAFETY FUND

AND EXEMPT DILBIT  
FROM FOREIGNERS TO BE REFINED IN FOREIGN OWNED DILBIT REFINERIES TO BE EXPORTED

TARIFF FREE

FOR FOREIGN INTERESTS?

Why?

Why the news blackout  
On the mega load?

Why the EPA whitewash assessment

Of KXL??

Why the dickens should you  
Spend a minute on this?

Leadership!

Bob Williams
