Dear Commissioners,

Please authorize IT Director Frohlich to structure your BCC minutes in Civicplus as Missoula does on their Civicplus site. This structure should reduce the time it takes to generate the draft minutes. Even more significantly, this structure should greatly aid each commissioner when reviewing draft minutes during the correction process, a process that currently takes weeks to months and does not afford them immediate access to the audio/video file. I don't believe the commission can justify any longer the current inefficient minutes approval process. It is time to utilize technology that works for others here in Montana.

Please see the following links:
