Subject: Wolves...

It's time for our local government to step in to help get this wolf disaster under control, since our state government has refused to do nearly enough to help the numerous Montanan's affected by this recovery plan which has been forced upon us by the federal government. Each time the number wolves that MT, ID and WY have been forced to digest to be deemed "recovered" the feds continue to move it up an up while our elk and deer numbers continually spiral downward. I have had more than enough of people in Washington taking away our way of life in Montana. Enough is enough.

Brent Olson.
